

Crestron AAS-1/2/4 Adagio™ Audio Server

ADDENDUM

The purpose of this addendum is to update information contained within the original Crestron AAS - 1/2/4 User Guide. Specifically, the information contained in this addendum is designed to replace the content on page 32, describing the configuration of network settings.

NETWORK CONFIGURATION

This insert provides a guide to configuring network connection settings on the Crestron Adagio Audio Server.

To access the **Connection Settings** menu:

- Press the **Menu** key on your remote control to display the **Function Menu**.
- Use the **▲** and **▼** keys to highlight the **Set Up** option.
- Press the **✓ Select** key.

The **Set Up** screen is displayed:

- Use the **▲** and **▼** keys again to highlight the **Connection Settings** option.
- Press the **✓ Select** key.

The **Connection Settings** screen is displayed:

This screen contains a number of options to allow you to configure the method your Audio Server uses to connect to the Internet and to your home network.

Internet Access

Select the **Internet Access** option to choose the method your Audio Server uses to access the Internet.

Choose between **Ethernet**, **Modem** or **None** as the access method and press the **OSave** key to commit any changes you make.

Edit Ethernet Settings

If you have selected **Ethernet** as your chosen **Internet Access** method, use the **Edit Ethernet Settings** option to choose between **DHCP** and **Static** as the **Ethernet Mode**.

If your Audio Server is connected to a network with a **DHCP** server present, specify **DHCP** as the **Mode** and the Ethernet settings should be assigned automatically.

Alternatively, to manually enter your own Ethernet settings, select **Static** as the **Mode** and a number of extra fields will appear on the **Ethernet Settings** screen:

Enter your own Ethernet details in the **IP Address**, **Subnet Mask**, **Gateway** and **DNS** fields. Press the **Save** key to commit any changes you make.

Assigned Ethernet Settings

Select **View Assigned Ethernet Settings** to see the current configuration of your Audio Server.

Note: The **Assigned Ethernet Settings** screen is for information only and has no editable options.

Modem Settings

If you select **Modem** as the Internet access method you must then input your Internet Service Provider's details on the **Edit Modem Settings** screen.

Note: After making changes to any of the **Connection Settings** screens, you may be prompted to restart your Audio Server in order for the new settings to take effect.
